To whom it may concern

Sales to Begin Today for Security Service Developed to Allow All Family Members to Safely Use the Internet

Compatible with multiple platforms; up to six smartphones and PCs can be operated with one license

Free for up to one year for new subscribers to the Company's @T COM and TNC Hikari fiber optic services

TOKAI Communications Corporation (hereinafter "TOKAI Communications"), a wholly owned subsidiary of TOKAI Holdings Corporation, will launch today the "TOKAI SAFE" comprehensive security service to protect under one license up to six mobile devices and PCs within the same household from internet-based trouble at one of the lowest price points in the industry as described in the attachment.

In line with the proliferation of smartphones, internet use is on the rise and so are chances to encounter trouble on the internet, placing increasing importance on maintenance of internet connection environments.

"TOKAI SAFE" support major operating systems (iOS, Windows, Mac, Android, etc.), and is a tool geared toward general users, providing antivirus functions and security to safely use internet searches, online shopping, online banking, and communication with family and friends, alongside parental controls.

Through promoting this service, which performs superior to offerings from other companies, the TOKAI Group will work toward acquiring new customers for its information and communications services for individuals and retaining existing customers.

As of September 30, 2016, there were around 1,070 thousand customers in Japan using the Group's information and communications services for individuals.

Under the TLC (Total Life Concierge) vision, the Group proposes comprehensive lineup of various lifestyle infrastructure services, including energy, information and communications, and CATV. Going forward, by continuing to actively work toward providing products and services that can contribute to solving regional and social issues, the TOKAI Group will aim to improve customer satisfaction.

F-Secure Japan KK

To whom it may concern

Smartphones and PCs, Six Devices under One License

Economical Security Service to Provide Safe Internet for the Entire Family

TOKAI Communications to launch solution developed by F-Secure
Free for up to one year and features enhanced parental control functions

TOKAI Communications Corporation (Headquarters: Shizuoka City, Shizuoka; President & CEO: Katsuhiko Tokita; hereinafter the "Company") announces that it has concluded a licensing agreement with F-Secure Japan KK (Headquarters: Minato-ku, Tokyo; Country Manager: Keith Martin) for the "F-Secure SAFE" security software, which incorporates its proprietary high-accuracy security engine.

Subsequently, the Company is launching today the "TOKAI SAFE" security service for households, a customized version of "F-Secure SAFE" that can be used on up to six devices with one license, with enhanced parental control functions to support proper internet use by children.

"TOKAI SAFE" is a multiplatform service compatible with multiple operating systems—including the iPhone (iOS)—and users can manage all devices from "My TOKAI SAFE Portal," an integrated web-based management console. As six devices can be used under one license, the product delivers a cost-effective, efficient environment for all members of the family to use the internet with peace of mind.

In addition to antivirus and anti-spam functions that combine multiple technologies such as sandbox, pattern file, and file reputation, alongside anti-phishing internet security functions, it also provides parental control features. These include designation of website categories permissible for viewing by children, and limitations on the time of day and total number of hours that the internet may be used.

* For service details, please see "Functions provided by 'TOKAI SAFE'" below.

As the first step, the Company will launch a free trial campaign for "TOKAI SAFE" in December for users of the Company's "@T COM Hikari" and "TNC Hikari" fiber optic broadband services and Commufa Hikari plans. New subscribers to these fiber optic broadband services may use TOKAI SAFE for up to one year, free of charge. After the trial period ends, customers may continue to use

the service for 400 yen per month.

- ♦ About "TOKAI SAFE"
  - ◊ Service launch: December 9, 2016
  - ◊ Applicable lines: @T COM Hikari, TNC Hikari, Commufa Hikari plans
  - ◊ Fee: 400 yen/month (excluding tax)
  - ◊ OS compatibility: Windows, Mac, Android, iOS, Windows Phone / Windows Mobile
    * For OS versions and hardware specifications, please see the website below:
    https://help.f-secure.com/product.html#home/safe/2016/en/concept_6BC643C15E884CD5A88861525E64EC7F-safe-2016-ja

- ♦ "TOKAI SAFE" characteristics
  - Multiplatform service compatible with various devices including iPhone
  - Integrated device management via web-based management console (theft and loss prevention, child monitoring, etc.)
  - Flexible licensing scheme allowing for free addition and removal of devices
  - Strong safeguards for children with measures against overuse via parental control functions
  - A single license allows for use on up to six devices, providing a safe internet environment for the entire family
  - Features F-Secure's highly accurate proprietary security engine

- ♦ Functions provided by "TOKAI SAFE"
  (1) Antivirus
  - Real-time antivirus measures
    An automatically updated pattern file monitors for virus files in real-time.
  - Manual scan
    The user may designate a specific file or directory for monitoring.
  - Scheduled scan
    A full scan of all disks at a date and time specified by the user.
  - Sandbox monitoring
    Prior to execution, file behavior is analyzed in a safe, isolated space to discover unknown viruses that are yet to be found in the pattern file.
  - File reputation monitoring
    Discovers the latest viruses by referencing an online database updated in real-time.
  - Behavioral monitoring
    Inspects behavior of programs that have not yet been deemed safe and terminates process if dangerous behavior is found.
  - E-mail scanning
    Monitors e-mail file attachments for viruses at the time of receipt.
  - Web traffic scanning
    Monitors file downloads from the web for viruses.

  (2) Internet security

- Prevention of dangerous URL connection
  Displays a warning message when connections are attempted to dangerous websites, such as phishing websites or websites associated with viruses.
- Safety level display for search results
  Icons are shown to indicate safe and dangerous websites for search engine results.
- Banking protection
  Connection protection is provided to allow for safe use of online banking.
- Network analysis
  Diagnosis of network safety when using networks such as free Wi-Fi hotspots.
- Anti-spam
  Upon receiving e-mail, determines if it is spam or a phishing e-mail.

(3) Parental controls
- URL filtering
  Ability to designate website categories that may be viewed.
- Limited use time
  Ability to set the time of day and total number of hours that the internet may be used.
- App restrictions
  Ability to limit the total number of hours per day that each app may be used.

(4) Other
- Finder
  If a device is lost, displays its location on a map or sets off an alarm, etc.

| TNC | http://www.tnc.ne.jp/tokaisafe/ |

▪ About TOKAI Communications

http://www.tokai-com.co.jp/ (Japanese only)

TOKAI Communications is a comprehensive provider of residential communications services in the individual consumer market, including fixed-line communications services for residential use—such as fiber optic internet connection services—alongside mobile communications services such as providing low-cost SIMs and smartphones as an MVNO operator.

In the modern broadband society with the internet at its core, TOKAI Communications utilizes a backbone of a proprietary fiber optic network, data centers, and technological expertise and development capabilities to provide a wide range of services in the information and communications sector to individual and corporate customers.

▪ About F-Secure

https://www.f-secure.com/en/

F-Secure is a Finland-based company providing online security and privacy protection. Its products have received numerous awards, protecting individuals and corporations from a wide range of threats, from crimeware to cyberattacks. Its products are sold in over 40 countries, through over 6,000 partner firms, and are provided by over 200 cloud services. Under the slogan of "Switch on freedom," F-Secure's mission is to support safe connections for people across the globe. Founded in 1988, it is listed on the NASDAQ OMX Helsinki Ltd exchange. F-Secure Japan KK was founded in 1999 as a wholly-owned local subsidiary, and in step with its growing sales, has since steadily expanded its scale.
